

BARCELONA VISITING LUCKENWALDE

04.04. 2008 - 10.04.2008

I suppose our exchange project was very successful and it was a lot more exciting, more instructive and funnier than I had anticipated. Of course there are some differences between the Spanish and the German students. But in my opinion it was interesting to learn to know new conventions and habits, even if they are a little bit different than ours.

I had a lot of fun in the six days and it seems that the Spanish felt in the same way. I had the feeling that we could learn a lot of from each other about the varied cultures and languages. I think the Spanish exchange students were likeable in their open, friendly character and because of that there will be some friendships cared.

In addition: in our English course developed a strong company because we did so many actions together. We know each other better because of the Spanish exchange program.

I enjoyed the time when the Spanish people were here and I am very exciting about Barcelona and hope that it will be as great as the time in Germany.
