

Personal impressions about the project week with the spanish students

At first I want to say that the week with the spanish students was an unforgettable, interesting and funny experience. I think everybody had a lot of fun with his or her exchange partner and with the others, too. I was very tired after the week, because we undertook something everyday, but I think that was of value.

The weekend was very cool, because Luis and I did a lot of things together and we had a lot of amusement while we do that.

The first day on which we all were together was the sports day with a following barbecue. A part of the time in which we played football, I was the only german student. It was great to play with the spanish pupils, because they all are very sportive.

On Monday it was good that Stephan and I showed them the city of Luckenwalde. I had a lot of fun. I think the trip to Berlin on Tuesday was very interesting for the spanish pupils. They saw the Reichstag, the Checkpoint Charlie and the Alexanderplatz for example.

On Wednesday we drove to Potsdam to watch the city. The weather wasn't good, but we all had high spirits, so it wasn't so bad.

On the last day we did a breakfast at school and after that we brought the spanish students to the train station of Luckenwalde and then we have to say goodbye to them. But nevertheless I believe all will be happy when the two groups meet each other again in October in Barcelona.
